

SAVE UP TO 85% ON WIRELESS LONG DISTANCE

Star Telecom long distance service for Blackberry smartphones enables you to save on **wireless long distance** calls¹ to Canada, US and overseas without the hassle of calling cards, access numbers or PINs. It allows you to easily dial your contacts directly from your Blackberry address book at a much lower rate than your wireless provider charges.

Rate Comparison for Canada:

Carrier	Rate
Rogers*	35¢/min
Bell*	35¢/min
Telus*	30¢/min
Fido*	30¢/min
Star Telecom	5¢/min

* Without a monthly long distance add-on plan

Most 3rd party long distance services for mobile phones require you to dial special access numbers. **Star Telecom** makes long distance calls as easy as dialing local calls: hassle-free; and if you have free incoming minutes, Star Telecom service can reduce what you pay for local calls as well.

Using our service is simple and it works with all Canadian carriers. If you make **long distance** calls to **Canada, US** or **overseas** using your **Blackberry**, our service is perfect for you!

- Standard air time and data charges may apply. Service available to business customers only.
- Star Telecom Long Distance Service is a callback service. All calls will be billed by your wireless provider at the incoming call rate. If you have a 'free incoming minutes' plan, you should not incur any airtime charges.
- Rates to non-mobile numbers. Rates to mobile numbers may vary.

Please note: Star Telecom Long Distance Service uses data bursts to initiate calls. Although the amount of data transmitted is minimal (less than 0.5 KB), your charges will vary based on your wireless data plan. We strongly suggest having at least a basic data plan, however even without a data plan the cost of data transmitted should be less than the cost of a one minute call. This is a long distance service, local calls in any country including Canada, will be charged at the advertised long distance rate (5¢/min in Canada).

FREQUENTLY ASKED QUESTIONS

1. Will I need to switch wireless providers to benefit from these great savings?

No. Star Telecom long distance service works with your existing wireless service provider. The only requirement is to have data access via Blackberry Enterprise Server (BES) or Blackberry Internet Services (BIS). No changes are necessary to make use of the Star Telecom dialer. With Star Telecom Dialer installed you will still be able to place calls through your wireless provider, as you do today, if you choose to do so.

2. I have a contract with my wireless provider. Does this prevent me from using the Star Telecom Dialer?

No, having a contract does not prevent you from using the Star Telecom Long Distance Service. Unless there are special provisions or commitments in terms of long distance, having a standard contract with your provider does not preclude you from using Star Telecom services in any way.

3. How will I be billed?

Based on successful credit approval Star Telecom will bill you on post-paid basis. You will be invoiced on a monthly basis for previous month's usage. You will also be provided Call Detail Records (CDRs) outlining the time, duration and cost of each call.

4. Is Star Telecom Service easy to set up?

Yes, the Star Telecom service is extremely easy to set up. You can be up and running in minutes. We will send you a link which once opened will guide you through installing the Star Telecom Dialer. That's it.

5. What is the difference between Star Telecom and other long distance services?

The main difference is that we like to keep it simple. Our service allows you to dial from your Blackberry address book. You do not need to remember access numbers, PIN codes or carry LD cards. It is about convenience as well as savings.

6. Are there any monthly fees or other costs?

No, there are no monthly, connection or any other charges, other than the cost of long distance calls. Your standard airtime and data charges still apply.

7. How much does it cost to call XYZ country?

Please check our web site for detailed rate information or contact us at rates@startelecom.ca if you have a question regarding a specific country or number.

8. What about security, reliability and uptime?

Our facilities are located in a world class data center with multiple power, security and carrier connection redundancies. Our uptime is on par with your carrier's telephone network: 99.999%. Keep in mind that even with the Star Telecom Dialer installed, you will still be able to make long distance calls as you do today, if you chose to do so.

9. What if I have other questions?

If you have any other questions, please do not hesitate to contact us at (416) 479-0325 Ext. 205 or at sales@startelecom.ca
